CONSTRUCTION EXPERIENCE

Licensed Contractor, State of California – Class A General Engineering and Class B General Building. From 1977 through 1993 was directly responsible for the operation of the Construction, Foundation and Concrete Products Divisions of his company and its subsidiaries. The company has appeared on the *Engineering News Record* list of the largest 400 contractors in the United States. Projects involved the following disciplines:

Construction

Cofferdams, concrete bridges, earth retention systems, industrial buildings, jails, parking garages, deep foundations, sewers, slurry walls, subaqueous pipelines & tunnels, water & sewage treatment facilities, wharves.

Manufacture of Precast – Prestressed Concrete Products

Foundation and sheet piling, large diameter concrete pipe, railroad ties. Structural elements for: parking garages, jails, industrial buildings, wharves and bridges.

ARBITRATION & MEDIATION EXPERIENCE

Broad experience in arbitration and mediation of construction-related disputes as an active arbitrator, mediator, and disputes-resolution board member. Among the first group of construction professionals to receive mediation training by the American Arbitration Association. Currently a member of the six-person California Public Works Arbitration Committee that is responsible for managing the public works arbitration system in California. Has had a high degree of success in fact-finding and achieving mediation settlements. Arbitrated/mediated disputes involving intent of contract documents, disputes between owner, architect and contractor, disputes between contractor, subcontractors and material suppliers, and disputes between subcontractors. Has also arbitrated/mediated disputes involving labor contracts. Lectures on subjects relating to construction disputes resolution.
